

MVM Group Health and Safety Policy

MVM Group's commitment and goals

MVM Group is committed to the values of Health, Safety and Fire Protection. We treat the protection of the health of our staff, the public and the environment as a key priority.

Our goal is to ensure this commitment is reflected in our day-to-day activities as well, in the factories, at the power plants, during the course of development projects, in the operations of our offices and sites, as well as in the behaviour and attitude of our employees and partners.

We are convinced that as part of our day-to-day processes, the continuous improvement of MVM Group's performance in the areas of health, safety and fire protection contributes to the Group's regional competitiveness, to the reduction in the environmental impact of its activities, to the protection of our natural heritage and of the population, and to responsible and sustainable operations.

We are committed to ensuring that all members of the MVM Group and all our business partners implement and apply efficient and safe technologies and the best practices available with a view to ensuring responsible operations in the field of health protection, work safety and fire protection.

In order to achieve our goals:

- we comply with the requirements specified in Hungarian and European law and our internal company regulations,
 - we support the preservation of the natural and built environments, the reasonable use of natural resources, and the research and development activities that serve our goals,
 - we take special care to prevent the outbreak of fires that would otherwise present a serious threat to life and property,
 - we develop and operate a management system related to occupational health protection and safety,
 - we continuously measure, evaluate, acknowledge and communicate our performance in the fields of workplace safety and fire protection,
 - we continuously improve the technical conditions of our equipment and devices, the professional competence of our employees, and our ability to manage emergencies, and we expect our partners to do the same.
- Ensuring safe and healthy working conditions and preserving our natural and built environment are key to continuously improving our performance as well as the responsibility of our all our employees and contractual partners.

Budapest, 27 June 2023
